BIRDLINK

Awareness of shared spaces and species

Participation to rebuild native flora and fauna into the urban fabric by the public
Citizen science efforts to identify and count birds with mobile App linking to the Cornell Lab of Ornithology bird population survey.

Public Art Project Seward Park 2018

Birdlink is full of windows yet can feel enveloping. Walking into the curling interior of the living screen, the visual impact yields to close inspection of threads of a living tapestry of plants. Sculpted bird figures also lure birds and people.
